

I CLAIM:

1. A fantasy sports drafting system comprising, in combination:
a computer server having fantasy sports drafting software loaded thereon;
a plurality of personal computers in communication with said computer server;
a plurality of display monitors, coupled to said personal computers;
wherein said fantasy sports drafting software permits execution of the following

steps:

inputting of identifying information relating to teams participating in a
fantasy draft;

inputting information regarding player selections occurring during said
fantasy draft;

generating a roster for each said team; and
displaying each said roster on said display monitor.

2. The system of Claim 1, further comprising a hub interposed between said
computer server and said plurality of personal computers.

3. The system of Claim 1 further comprising a console in communication with
said computer server.

4. The system of Claim 3 wherein said console is coupled to said hub.

5. The system of Claim 1 wherein said identifying information includes a team
name.

6. The system of Claim 5 wherein said identifying information further includes a
participant name.

7. The system of Claim 1 wherein said player selections information includes a name and position of a player selected during said fantasy draft.

8. The system of Claim 1, wherein said fantasy sports drafting software further permits execution of the step of inputting information regarding an amount spent to select a player during said draft.

9. The system of Claim 8, wherein said fantasy sports drafting software further permits execution of the step of calculating an amount of money available to be spent by a participant in said draft.

10. A method for conducting a fantasy sports draft comprising the steps of: inputting of identifying information relating to teams participating in a fantasy draft;

inputting information regarding player selections occurring during said fantasy draft;

generating a roster for each said team;

displaying each said roster on at least one display monitor so that it may be viewed by a plurality of participants in said fantasy draft;

wherein said at least one display monitor is co-located with said plurality of participants in said fantasy draft.

11. The method of Claim 10 wherein said identifying information includes a team name.

12. The method of Claim 11 wherein said identifying information further includes a participant name.

13. The method of Claim 10 wherein said player selections information includes a name and position of a player selected during said fantasy draft.

14. The method of Claim 10, further comprising the step of inputting information regarding an amount spent to select a player during said draft.

15. The method of Claim 14, further comprising the step of calculating an amount of money available to be spent by a participant in said draft.

16. The method of Claim 10, further comprising the step of permitting at least one participant who is not co-located with said display monitors to participate in said fantasy draft.

17. The method of Claim 10 further comprising the step of printing a team roster for each participating team.

18. The method of Claim 10, further comprising the step of downloading to a server associated with a web-site an electronic version of at least one team roster for at least one participating team, so that it may be uploaded by at least one said participant.
